Mobile App Features Map

Vision

The vision for the mobile version of the project platform is to allow streamlined access to the base functions of the business. The goal is for users to feel like they can live their life without living in front of their computer. They can manage their project lifestyle from their mobile device.

They Can:

- Communicate
- Mark themselves available for Instant Tasks
- Look for Projects to work for
- Mark Projects Complete
- Create Projects
- Release funds to Doers

- *Instant Project*
- *In-Person Project*
- *Virtual Project*

Communication

The Communication functions on the mobile version will function with the same ruleset as the web platform. Users who are connected will be able to message each other. Users who are actively working or bidding can message the poster. Premium users can message anyone, anytime; and will have access to VOIP calling.

Complete the Task

The If the task is marked complete by the Doer, they leave a rating and then return to the mobile dashboard.

If the task is marked complete by the Poster, they leave rating feedback and then release the funds.
